in this case, the restorer would consist of the atmyb103 gene under the control of a strong anther specific promoter such as the at39 promoter (pp39103)

that is why vata predominant disorders are profound in old age.

its like you read my mind you seem to know a lot about this, like you wrote the book in it or something

similar to eachother, to indicate that there's likely little to no adulterants in fireclean separating
